

Geleitwort von GM Rene Latosa

Marcus,

Congratulations on your book. Having been one of my private students for many years, you have always been on the discovery end of learning how Latosa-Escrima works and is taught. It is, as you know, a complicated system yet seemingly very simple. The road to understanding Latosa-Escrima is all about discovery. By discovery, this means to find the truths and the methods by learning it through trial and error. Once you discover the essences of what I teach, it stays with you. Thank you for being such a student, a Guro, and growing and progressing with the system. Hope your book is a success and that you have more to add in future books.
